BMJ in the News is a weekly digest of BMJ stories, plus any other news about the company that has appeared in the national and a selection of English-speaking international media.

This week's (11-17 Sep) highlights:

- A study in BMJ Open that found limited evidence for potential harms of light drinking in pregnancy generated front page stories in The Times and The Daily Telegraph, and was also covered widely across the UK and international media
- Two articles in The BMJ this week generated global coverage - experts debating the benefits and potential harms of Google’s depression test (coverage included The Daily Mail, The Sun, and the Australian Journal of Pharmacy) - and doctors advocating weight loss to reverse type 2 diabetes (coverage included BBC News, The Telegraph and New Delhi TV)
- A BMJ Case Report about a man developing cyanide poisoning from apricot kernel extract generated global headlines, including Huffington Post, New York Daily News and South China Morning Post

Rackspace acquires Datapipe to further bolster managed services play - Cloudtech 12/09/2017
