

PADDINGTON GREEN CHILDREN'S HOSPITAL, W.—(1) House-Physician. (2) House-Surgeon. Appointments for six months. Salary at the rate of 50 guineas per annum, with board and residence. Applications to the Secretary by April 15th.

PLYMOUTH PUBLIC DISPENSARY.—Second Honorary Physician. Applications to the Secretary by April 11th.

PORTSMOUTH BOROUGH.—Public Analyst. Salary, £250, rising to £300 per annum. Applications, endorsed "Public Analyst," to be sent to the Town Clerk, Town Hall, Portsmouth, by April 15th.

ST. PETER'S HOSPITAL FOR STONE. Henrietta Street, W.C.—House-Surgeon. Appointments for six months, but eligible for re-election. Salary at the rate of £100 per annum, with board, lodging, and washing. Applications to the Secretary by April 15th.

SUNDEBLAND INFIRMARY.—House-Surgeon. Salary, £100 per annum, with board and residence, increasing £15 yearly for three years. Should present House-Physician be elected the appointment will be for House-Physician. Applications, endorsed "Application for Resident Medical Appointment," to be sent to the Secretary by April 18th.

TOWER HAMLETS DISPENSARY. White Horse Street, Stepney, E.—Resident Medical Officer. Salary £150 per annum, with furnished rooms, coals, gas, and attendance. Applications to Dr. J. Sequerra, 33, Welbeck Street, Cavendish Square, W.

WANDSWORTH AND CLAPHAM UNION.—Assistant Medical Officer at the Home for Aged and Infirm, Church Lane, Tooting; unmarried. Salary, £130 per annum, rising to £150, with apartments, board, lodging, and washing. Applications to the Clerk, Union Offices, St. John's Hill, Wandsworth, S.W., by April 8th.

WEST HAM UNION.—(1) Assistant Medical Officer. Salary, £150 per annum, and residential allowances. (2) Dispenser, non-resident. Salary, £29 per annum, with dinner and tea daily. Applications, on forms provided, to be sent to the Clerk, Union Workhouse, Leytonstone, N.E., by April 15th.

WEST NORFOLK AND LYNN HOSPITAL.—House-Surgeon. Salary, £100 per annum, with board, residence, and washing. Applications to the Chairman of the Weekly Board by April 10th.

WEST RIDING ASYLUM. Monstun, near Leeds.—Lady as Resident Clinical Clerk. Board and residence provided. Applications to the Medical Superintendent.

WOLVERHAMPTON EYE HOSPITAL.—House-Surgeon. Salary, £70 per annum, with rooms, board, and washing. Applications to the Secretary by April 7th.

YORK DISPENSARY.—Resident Medical Officer. Salary, £110 per annum, with board, lodging, and attendance. Applications to W. Draper Esq., De Grey House York, by April 9th.

MEDICAL APPOINTMENTS.

BARON, Barclay J., M.B., C.M. Edin., appointed Honorary Consulting Physician to the Treatise Department of the Bristol General Hospital.

BLUE, G., M.B., B.Ch., B.U.I., appointed Medical Officer for the Skelton District of the Guisborough Union.

CHAPMAN, Walter, M.B., Ch.B., F.R.C.S., L.R.C.P., appointed Surgeon to the Birmingham Corporation Waterworks and Hospital in Eian Valley.

DAWE, E., M.D. Lond., B.Sc., appointed Assistant Medical Officer to the London Fever Hospital.

FAIRBAIN, John Shields, M.B., B.Ch. Oxon., F.R.C.S. Eng., M.R.C.P. Lond., appointed a Physician in Charge of the British Lying-in Hospital, Endell Street.

FIRTH, John Lacy, M.D., M.S. Lond., appointed Physician to the Throat and Nose Department of the Bristol General Hospital.

FOGGIN, George, B.A. Lond., L.R.C.P. & S. Edin., etc., appointed Principal Medical Officer to the Newcastle-upon-Tyne School Board.

HANNAH, Nathan, L.R.C.P. Edin., L.F.P.S. Glas., appointed Certifying Factory Surgeon for the Ashton-in-Makerfield District in the county of Lancaster.

HERRIER, F. D., M.D. Edin., appointed Senior Assistant Medical Officer to the North Riding Asylum, York.

HILL, Hedley, M.D. Brux., M.B.O.S., L.R.C.P. Lond., appointed Assistant Anaesthetist to the Bristol General Hospital.

LOW, Charles Wm., M.B. Durh., D.P.H., reappointed Medical Officer to the Stowmarket Urban District Council.

WHITMORE, F. C., M.R.C.S., appointed Deputy Medical Officer for the Workhouse, and the No. 1 District of Thornbury Union.

WEATES, Wm., L.R.C.P. Edin., L.R.C.S. Edin., L.F.P. & S. Glas., appointed Medical Officer to the Heworth District of the Gatahead Union.

DIARY FOR NEXT WEEK.

TUESDAY.

Pathological Society of London, 20, Hanover Square, W., 8.30 p.m.—Mr. L. Caeate: The Relation of Carcinoma to Nerve Distribution or Tropic Areas (Lantern Demonstration). Dr. Beevor and Dr. E. F. Buzzard: Suppurative Meningitis due to Streptococcus. Dr. G. S. S. B. Arnold: Angioma of the Brain. Mr. H. Shattock: The Nature of the Vacuolation in Fat Cells. Dr. J. Broadbent: Rupture of Aortic Aneurysm into the Pulmonary Artery. Dr. R. T. Hewlett: Rupture of Aortic Aneurysm into the Superior Vena Cava. Card Specimens by Dr. Thurstfield and Dr. J. Broadbent.

WEDNESDAY.

Dermatological Society of London, 11, Chandos Street, Cavendish Square, W., 5.15 p.m.—Demonstration of Cases of Interest.

Hunterian Society, London Institution, Finsbury Circus, E.C., 8.30 p.m.—Discussion on the Present Methods of Treating Tuberculosis.

POST-GRADUATE COURSES AND LECTURES.

Medical Graduates' College and Polytechnic, 23, Chancery Street, W.C. Demonstrations will be given at 4 p.m. as follows:—Monday, skin; Tuesday, medical; Wednesday, surgical; Thursday, surgical. Lectures will also be given at 5.15 p.m. as follows:—Monday, On Therapeutic Inoculation; Tuesday, Cancer; Wednesday, On Cerebral Softening; Thursday, The Anatomy, Common Ailments of the Liver, and their Surgical Treatment.

BIRTHS, MARRIAGES, AND DEATHS.

The charge for inserting announcements of Births, Marriages, and Deaths is 3s. 6d., which sum should be forwarded in post-office orders or stamps with the notice not later than Wednesday morning in order to ensure insertion in the current issue.

BIRTH.

GARFIT.—On Tuesday, March 31st, at Kirby-Muxloe, near Leicester, the wife of Charles Corringham Garfit, M.B., Ch.B. Vict., of a son.

MARRIAGES.

CORNER-HENDERSON.—At Dundee, on March 31st, Edred Moss Corner, F.R.C.S., youngest son of Francis Corner, Esq., M.D., London, to Henrietta, second daughter of James Henderson, Esq., The Gows, Invergowrie, Forfarshire.

KIDD-JOHNSON.—On March 28th, at Holy Trinity, Islington, by the Rev. F. J. Birkett, assisted by the Rev. T. Lancaster, Vicar, and the Rev. E. Lopresti, Harold Andrew Kidd, Medical Superintendent of the West Sussex County Asylum, Chichester, to Mildred Isabel Carline, youngest daughter of Captain Johnson, Governor of H.M. Prison, Pentonville.

DEATHS.

FLEMING.—At 10, Chester Street, Edinburgh, on March 28th, suddenly, Henry Bowly, infant son of Robert A. Fleming, M.D., aged 5 months.

TRINDER.—On January 5th, 1903, at Harley Street, London (after surgical operation), Mary Mand, the beloved wife of Alfred Probus Trinder, M.R.C.S., L.R.C.P., District Surgeon, Volksrust, Transvaal (late Civil Surgeon, R.A.M.C.).

LETTERS, NOTES, AND ANSWERS TO CORRESPONDENTS.

COMMUNICATIONS respecting Editorial matters should be addressed to the Editor, 2, Agass Street, Strand, W.C., London; those concerning business matters, advertisements, non-delivery of the JOURNAL, etc., should be addressed to the Manager, at the Office, 429, Strand, W.C., London.

ORIGINAL ARTICLES and **LETTERS** forwarded for publication are understood to be offered to the BRITISH MEDICAL JOURNAL alone, unless the contrary be stated.

AUTHORS desiring reprints of their articles published in the BRITISH MEDICAL JOURNAL are requested to communicate with the Manager, 429, Strand, W.C., on receipt of proof.

CORRESPONDENTS who wish notice to be taken of their communications should authenticate them with their names—of course not necessarily for publication.

CORRESPONDENTS not answered are requested to look at the Notices to Correspondents of the following week.

MANUSCRIPTS FORWARDED TO THE OFFICE OF THIS JOURNAL CANNOT UNDER ANY CIRCUMSTANCES BE RETURNED.

In order to avoid delay, it is particularly requested that ALL letters on the editorial business of the JOURNAL be addressed to the Editor at the Office of the JOURNAL, and not at his private house.

TELEGRAPHIC ADDRESS.—The telegraphic address of the EDITOR of the BRITISH MEDICAL JOURNAL is *Atiology, London*. The telegraphic address of the MANAGER of the BRITISH MEDICAL JOURNAL is *Articulate, London*.

Queries, answers, and communications relating to subjects to which the special departments of the BRITISH MEDICAL JOURNAL are devoted will be found under their respective headings.

We would request correspondents who desire to ask questions in this column not to make use of such signatures as "A Member," "A Member B.M.A.," "Enquirer," and so on. By attention to this request much confusion would be avoided. Correspondents are asked to write upon one side of the paper only, and when sending more than one question to put them on separate slips.

QUERIES.

A COUNTRY MEMBER would be glad to know if x-ray treatment has been used for carcinoma of the rectum, and if any benefit resulted.

M.D. CANTAB. is about to take on a country town practice, and wishes to know the best form of couch and chair (combined if possible) for his consulting room. He has a leaning towards gynaecology, and prefers the Continental method of examining patients.

X. Y. Z. would be glad of suggestions as to the treatment of the following case: The patient, a thin wiry man, 60 years of age, suffers from enlarged prostate. Catheter life for the last three or four years. He complains of feeling when in bed at night, sometimes during the day, a pain, which starts on the left side, over the colon apparently. He feels a desire to go to stool, but passes nothing but a slight trace of mucus. Urine alkaline, albuminous, no stone, no malignant mischief apparently. The patient has gained a little in weight. No remedy appears to give any relief. Enemata have been tried without any permanent good. The bowels are quite regular.

ANSWERS.

C. B.—The odour of turpentine in a liniment may be to some extent covered by the addition of any volatile oil with an agreeable odour, such as oil of lavender or oil of rosemary.

ENQUIRER would probably find information of the kind he requires in the *Dictionary of Psychological Medicine*, edited by the late Dr. Hack Tuke (2 vols.) (London: J. and A. Churchill, 1892, 42s.).

DR. V. E. SORAPURE.—The following would probably meet our correspondent's requirements: Olshausen and Veit, *Lehrbuch der Geburtshilfe*, 1902 (Bonn: Cohen, 1 vol.); Küstner, *Kurzes Lehrbuch der Gynäkologie*, 1901 (Jena: Fischer; paper covers M. 6, bound M. 7.50, 1 vol.).

M.D. would probably find Caird and Cathcart's *Surgical Handbook*, eleventh edition (London: C. Griffin and Co., 1902, 8s. 6d.); and Fothergill's *Manual of Midwifery*, second edition (Edinburgh: W. F. Clay, 1900, 9s.) suitable for his purpose.

DR. CECIL E. SALT.—There is no reason for professional prejudice against the practice of radiography by laymen, so long as they confine themselves to the mere mechanical act of producing a picture and abstain from assuming a scientific knowledge of the bearings of their radiographs on diagnosis or prognosis. Of those engaged in x-ray work only qualified practitioners are entitled to undertake the treatment of disease.

MEDICAL ATTENDANCE ON SOLDIERS.

A. J. H.—The rates of payment laid down in Army Form O. 1667 are as follows: Each Visit.—Day—Under a mile, 1s. 6d.; over one mile but under two miles, 2s.; for greater distances, 1s. 6d. a mile. Night—10 p.m. to 7 a.m.; under a mile, 2s. 6d.; over a mile, double the day rates. When the practitioner charges full rates for medicines, charges for visits under the distance of a mile are inadmissible. Medicines.—According to nature and quantity from 1s. to 4s., the scale being laid down in the instructions on the form. The bill must be rendered on Army Form O. 1667, which must be sent to the regimental headquarters.

TREATMENT OF OBSTINATE CONSTIPATION IN A CHILD.

W. E. writes: In reply to "N. B. H.," who asks for suggestions on the treatment of obstinate constipation in a child of 4 years, I would advise him to give her magnesium carbonate, either the heavy or the light carbonate will do, though I think the light is better. Two or 3 gr. in water at night time is generally sufficient, but a little more may be needed at first. After a few weeks a dose may now and then be omitted, and after a time it may not be necessary to give the medicine more than once or twice a week. The prescription may be written thus: R magnes. carbon. levis ʒj, aq ad ʒvj, ʒj omni nocte horā somni.

W. S. S. (Powis Square) writes: Might I suggest, in answer to "N. B. H.," on page 771 of the March 28th number of the BRITISH MEDICAL JOURNAL, that he should examine for adenoid growths in the posterior nares, as I have recently operated on a boy of 8 years for adenoids, and cured not only his breathing but also his chronic constipation, which had been a great trouble to him for some time, so much so that he has twice had

convulsions due to derangement of his alimentary canal, the main treatment of the convulsions being large enemata.

DR. R. E. FOOT (Wood Green, N.) writes: In answer to "N. H. B.," Treatment of Obstinate Constipation (BRITISH MEDICAL JOURNAL, March 28th), I suggest that a massage ball be made as follows: Get 3 lb. to 4 lb. of No. 10 gunshot and a child's playball; put a puncture in it and fill in shot until the ball is full and hard; then seal up the hole with a patch for mending puncture in bicycle tire. This is to be rolled over the abdomen for ten minutes night and morning when patient is in bed. In some cases it acts at once, others have to use it for two or three weeks before effect is obtained. This will cure ordinary cases of obstinate constipation in young or old. Drugs will never do so. It acts by toning up the bowel, pushing on its contents, and by increasing peristaltic action.

TREATMENT OF CHRONIC DIARRHOEA.

E. B. F. writes: Has "P. A. W." (BRITISH MEDICAL JOURNAL, March 21st, p. 717) tried small doses of arsenic before meals, to which might be added an occasional pil. plumbi cum opio and a weekly dose of castor oil?

THE TREATMENT OF PROLAPSUS UTERI.

DR. G. CREWSDON THOMAS (Sydenham) writes: In reply to Dr. Percy Newell's (Crowborough) question in the BRITISH MEDICAL JOURNAL of March 21st re the treatment of prolapsus uteri, I beg to inform him that the exact method of technique has been described by Dr. Inglis Parsons in the BRITISH MEDICAL JOURNAL. The first account was in the number for October 23rd, 1897. It was again referred to on October 5th, 1901, and last year at the Obstetrical Section of the British Medical Association meeting some further modifications of the treatment were put forward in a paper on the subject.

DRIGULSKI-CONRADI MEDIUM CULTURE.

R. N.—An account of the method of preparation will be found in a paper entitled *Ueber ein Verfahren zum Nachweis der Typhus Bacillen*, by Drigulski and Conradi (*Zeit. für Hyg.*, 39, 1902, p. 282).—Prepare as follows: A. Agar solution; B. Litmus solution. A. Put 3 lb. finely-minced beef into 2 litres of water, and allow to stand till following day. Press out the "Fleischwasser," boil for one hour, filter, add 20 gr. dry Wittes peptone (pep. siccum), 20 gr. nutrose, and 10 gr. NaCl, boil for one hour, and add 60 gr. finest bar agar, boil for three hours (or for one hour in the autoclave), make faintly alkaline to litmus, filter, and boil for half-an-hour. B. Take 260 c.c.m. of Kubel and Tiemann's litmus solution, boil for ten minutes, add 30 gr. chemically pure milk-sugar, and boil for fifteen minutes. Well mix A and B, and re-establish the faintly alkaline reaction, add 4 c.c.m. of a hot sterile solution of 10 per cent. anhydrous soda and 20 c.c.m. of freshly-prepared solution of 1 gr. crystal violet B. (Hochst) in 100 c.c.m. of warm distilled water. The authors give many details of manipulation and technique, for which the original memoir should be consulted.

LETTERS, NOTES, Etc.

OFFICER IN CHARGE OF BEARER COMPANY has omitted to enclose his card.

A WARNING.

DR. H. RADCLIFFE CROCKER (Harley Street, W.) writes: I am informed that a man of the name of "Dr. East" (or some similar sounding name) is calling on medical men in Brighton describing himself as "Dr. Crocker's assistant," and trying to sell copies of my *Atlas of Diseases of the Skin*. I write to say that I know nothing of this person who is making this unauthorized use of my name, and except at the hospital have no assistant. I may say that the *Atlas* is the property of the publisher, and my own interest is a small royalty on each copy sold.

ROYAL MASONIC SCHOOL.

The executors of the late Lieutenant-Colonel S. J. Flood, R.A.M.C. (Dr. Richard Flood of Bundoran and Mr. Arthur Tuffield of 5, Brunswick Place, Cambridge), earnestly appeal to all medical Masons, and especially to those connected with the R.A.M.C., to give their votes to Samuel Basil Flood, youngest son of the above-mentioned Lieutenant-Colonel Flood, at the April election to the Royal Masonic School, for although he obtained 3,226 votes, he was unsuccessful in October last. The late Lieutenant-Colonel Flood had seen much active service on the West Coast of Africa; he was a most ardent Mason, having been connected with many lodges in this country and in India. He died at the early age of 42, leaving four young children very inadequately provided for. Votes will be gratefully received by Arthur Tuffield, 5, Brunswick Place Cambridge.

THE SERUM TREATMENT OF PNEUMONIA: A SUGGESTION.

DR. DAN MCKENZIE (Leytonstone) writes: The clinical history of an ordinary case of pneumonia seems to show that the sudden change from grave illness to convalescence, marked by the critical fall of the temperature, is due to the formation of a pneumococcus antitoxin in the blood of the patient. That being probable, the following suggestion may be deemed worthy of being submitted to experimental proof. Let some blood plasma taken from a patient who has just passed the crisis of the disease be injected hypodermically—as is done with diphtheria antitoxin—into a patient who is still in the pyrexial stage. It is just possible that thereby a successful result might be obtained. Since this idea first occurred to me I have not had two patients with pneumonia at the stages necessary for carrying out the experiment. Others, however, whose opportunities are more favourable, may consider the method worth trying.

A SUPPLEMENTARY TEST FOR INTOXICATION.

DR. FRANCIS W. GRANT (Blackpool) writes: I read with some degree of interest the letter published in the JOURNAL of March 7th, 1903, p. 538, on the above subject, and wish to express my concurrence in all my namesake (Dr. Grant, London) says on this important matter. I have invariably discarded the usual methods of testing whether a man is under the influence of liquor, and for 13 years as police surgeon have had recourse to what your correspondent says regarding the diagnostic value of inquiring the time of day of any suspected person. I have seldom found it fail.

MEDICAL OFFICERS IN THE HIGHLANDS AND ISLANDS OF SCOTLAND.

MISS C. E. O'CONNOR writes: I am sorry that the portion of my article which was reproduced in the BRITISH MEDICAL JOURNAL seems to convey exactly the opposite impression to that which was intended in

the original article in the *Women Students' Medical Magazine*. I do not imagine that any one will ever make a fortune in the smaller islands of Orkney, and I should not recommend one of these posts to a man with a family to support, nor to any one who wished to enjoy a comfortable income and light work. But I do most strongly recommend them to newly-qualified medical women who desire experience in their profession, and to whom a couple of years of healthy open-air life would act as a valuable antidote to five years of close study in a stuffy town. The courtesy, kindness, and hospitality of these islanders makes work amongst them a pleasure, and will always be a pleasant memory to any one who looks at the human, and not merely the commercial, side of their profession.

May I point out that in the letter of "Non-Sweater" *Evay* is through-out a misprint for *Eday*?

LETTERS, COMMUNICATIONS, Etc., have been received from:

A. A.M.S.; Dr. P. E. Adams, Winchfield; Dr. J. J. Austin, Belfast; J. W. Allen, M.B., Glasgow; A. B. and C. Dr. J. W. Byers, Belfast; Mr. B. Baldwin, Darley Abbey; Mr. H. Burrows, London; Mr. J. C. SCALE OF CHARGES FOR ADVERTISEMENTS IN THE BRITISH MEDICAL JOURNAL.

Eight lines and under	£	4	0
Each additional line	0	6	
A whole column	2	0	6
A page	5	5	0

An average line contains six words.

Advertisements should be delivered, addressed to the Manager, at the Office, not later than first post on Wednesday morning preceding publication; and if not paid for at the time, should be accompanied by a reference.

Post-Office Orders should be made payable to the British Medical Association at the General Post-Office, London. Small amounts may be paid in postage-stamps.

N.B.—It is against the rules of the Post Office to receive letters at *Poëce Restantes* addressed either in initials or numbers.
