WILLIAMS, J. O., M.E.C.S., L.R.C.P., Medical Officer of Health for Bournemouth Urban District, *vice* Arthur Hughes, M.E.C.S.Eng.

DIARY FOR NEXT WEEK.

POST-GRADUATE COURSES AND LECTURES.

Medical Graduates' College and Polyclinic, 22, Chancery Street, W.C.—The following clinical demonstrations have been arranged for next week at 4 p.m. each day: Monday, Skin Diseases; Tuesday, Medical Cases; Wednesday, Surgical Cases; Thursday, Surgical Cases; Friday, Ear Cases.

BIRTHS, MARRIAGES, AND DEATHS.

The charge for inserting announcements of Births, Marriages, and Deaths is 3s. 6d., which sum should be forwarded in post-office orders or stamps with the notice not later than Wednesday morning, in order to ensure insertion in the current issue.

BIRTHS.

BRUCE PEARSON.—On September 8th, at The Cottage, Buckingham, the wife of Bruce Pearson, L.R.C.P., etc., of a son.
GODDARD.—On August 21st, at Naval Hill, Bloisfontein, O.R.C., the wife of Captain G. H. Goddard, R.A.M.C., of a son.

MARRIAGES.

BARNES-ORMSBY.—On September 13th, at North Street Church, Brighton, by the Rev. E. Dowse, J. A. Percival Barnes, L.R.C.P., M.E.C.S., son of the Rev. John Barnes, of Sutton, Surrey, to Louisa Eileen, elder daughter of Thomas Ormsby, Esq., solicitor, of Beaumont, Blackrock, Co. Dublin.
BLACKBURN-SHOTTON.—On August 31st, at St. Woolos Church, Newport, Monmouth, by the Rev. B. Lloyd, Vicar, assisted by the Rev. L. E. Richardson, Curate, Vernon Kent Blackburn, M.E.C.S., L.R.C.P.Lond., of Barnsley, Yorkshire, elder son of John Blackburn, M.E.C.S., of Barnsley, to Katie, eldest daughter of John Webb Shotton, of Newport.
BUNTING-WALKER.—On September 8th, at Wesley Chapel, Bolton, by the Rev. Thomas Allen, D.D., and the Rev. George Oyston, B.A., William Hartley Bunting, M.D., F.R.C.S. Edin., to Edith Maude, younger daughter of Thomas Walker, J.P., of Southfield, Bolton.
WHITE-PULLIBLANK.—On September 7th, at St. Michael and All Angels, Ramingham, Dorsetshire, by the Rector, father of the bride, assisted by the Rev. W. Beale White, M.D., and Rev. Leonard H. White, M.A., brothers of the bridegroom, Clement White, M.D. Cantab., to Emily Jane Pullblank.

DEATHS.

CARVER.—On Wednesday, September 7th, at Torquay, Edmund Carver, M.D., late of Cambridge, aged 80. Friends will please accept this intimation—no flowers, by request.
JAMESON.—On September 13th, at Newlands, Eltham, Surgeon-General J. Jameson, O.B., K.H.S., etc., late Director-General Army Medical Service, aged 67.
RUSHTON.—On September 11th, at Fordonate, Macclesfield, John Latham Rushton, Junr., M.E.C.S.Eng., L.R.C.P.Lond., aged 23 years, elder son of John Latham Rushton, M.D.

LETTERS, NOTES, AND ANSWERS TO CORRESPONDENTS.

COMMUNICATIONS respecting Editorial matters should be addressed to the Editor, 2, Agar Street, Strand, W.C.; London; those concerning business matters, advertisements, non-delivery of the JOURNAL, etc., should be addressed to the Manager, at the Office, 425, Strand, W.C., London.

ORIGINAL ARTICLES and **LETTERS** forwarded for publication are understood to be offered to the BRITISH MEDICAL JOURNAL alone, unless the contrary be stated.

AUTHORS desiring reprints of their articles published in the BRITISH MEDICAL JOURNAL are requested to communicate with the Manager, 425, Strand, W.C., on receipt of proof.

CORRESPONDENTS who wish notice to be taken of their communications should acknowledge them with their names—of course not necessarily for publication.

CORRESPONDENTS not answered are requested to look at the Notices to Correspondents of the following week.

MANUSCRIPTS forwarded to the OFFICE of THIS JOURNAL CANNOT UNDER ANY CIRCUMSTANCES BE RETURNED.

In order to avoid delay, it is particularly requested that ALL letters on the editorial business of the JOURNAL be addressed to the Editor at the Office of the JOURNAL, and not at his private house.

TELEGRAPHIC ADDRESS.—The telegraphic address of the EDITOR of the BRITISH MEDICAL JOURNAL is *Atibboly, London*. The telegraphic address of the MANAGER of the BRITISH MEDICAL JOURNAL is *Articulate, London*.

TELEPHONE (National).—**GENERAL SECRETARY AND MANAGER.**
 EDITOR, 2631, Gerrard. 2630, Gerrard.

Queries, answers, and communications relating to subjects to which special departments of the BRITISH MEDICAL JOURNAL are devoted will be found under their respective headings.

QUERIES.

MEDICUS would feel obliged by being informed of a very dry place in England suitable for a young patient suffering from albuminuria to winter in.

R. wishes to know where he can obtain lantern slides of signs of early pregnancy, areola, diagrammatic of cervix, shape, etc., for clinical lecture purposes.

INSECT STINGS.

H. J. W. asks whether any reader has found anything of especial value as a local application in cases of stings by wasps, etc. A little white back a slice of onion applied was mentioned in one of the daily papers as a sure cure. Is this a useful remedy?

SNORING.

SOMNUS asks for a remedy for the unfortunate and most disagreeable nuisance of snoring. He has often been consulted about it, but all the remedies suggested seem to have failed.

THE ELECTION OF CORONERS.

SENEX writes to inquire as to the appointment of coroners, their remuneration, as to publications in which vacancies are advertised, and where a list of existing coroners can be obtained.

* * * Coroners are now elected either as county coroners by members of the County Councils, or as borough coroners by members of the Corporations. A list of the present coroners and their respective districts is now published in Churchill's *Medical Directory*. The salary paid to coroners varies considerably, and is fixed by agreement between the coroner and the authority that appoints him, and is usually based upon a quinquennial estimate of the average yearly number of inquests held during that period. In case of non-agreement on this matter there is an appeal to the Home Secretary, whose decision is final. When a vacancy occurs, advertisements sometimes appear in the medical and legal journals, but more frequently in the daily or local newspapers

ANSWERS.

We would request correspondents who desire to ask questions in this column not to make use of such signatures as "A Member," "A Member B.M.A.," "Enquirer," and so on. By attention to this request much confusion would be avoided. Correspondents are asked to write upon one side of the paper only.

GRINDELWALD.

J. W. G.—The skating and tobogganing season at Grindelwald begins early in December, and ends usually towards the close of February. At Davos the season is longer, beginning some weeks earlier, and ending considerably later. The hotel charges would probably be rather lower at Grindelwald for similar accommodation.

PRESERVATION OF CREAM

STERILIZER.—(1) Cream may be pasteurized at or about 70° C. in any of the ordinary domestic pasteurizers, of which there are a number on the market. (2) Probably the vendors whose cream keeps better than that procured from the farm pasteurize it, but it is impossible to say without further information as to the company. (3) Cream in tins should keep good indefinitely, if sterilized and properly sealed.

CHRONIC SCIATICA.

A. B. C. writes: In reply to "X. Y. Z." I have seen two cases which were due to a tumour in the rectum. I have heard of other cases which were due to other tumours contained in the pelvis or abdomen.

ADMINISTRATION OF DRUGS BY MIDWIVES.

FORCEPS.—A midwife certified under the Midwives Act of 1902 is permitted, by the rules framed by the Central Midwives Board, to administer ergot, opium, or any other remedy commonly used in the management of normal labour. The midwife is, however, bound to enter in her casebook every dose of medicine she has given to her patients, and also the purpose for which it has been administered, and this book must be duly submitted to the local supervising authority of the County Council within whose area she has received permission to practise.

CHLORIDE OF ETHYL AS A GENERAL ANAESTHETIC.

E. M.—Chloride of ethyl can be administered for general anaesthesia. After narcosis is fully established air should be admitted, and a or 3 c.cm. sprayed into the bag every two or three minutes as occasion demands. As air is excluded during the actual inhalation, it is of course necessary to allow the patient to breathe air from time to time. As to the length of time during which the anaesthetic is given, that must depend upon the requirements of the operation and the state of the patient. The possible dangers arise from interference with respiration, and signs of respiratory difficulty must be watched for, and if present would indicate either that the dose of the anaesthetic given was too great, or that the patient is suffering from the effect of the repeated small doses. In this case ether can readily be given in place of the chloride of ethyl. Some authorities record failure of circulation under chloride of ethyl, and, remembering this, any tendency to pulse feebleness or syncope should place the anaesthetist upon his guard, and lead him to desist from the administration, or replace the anaesthetic by ether.

LETTERS, NOTES, ETC.

FORMOL IN CORYZA.

DR. ALFRED S. GUBB (Aix-les-Bains) writes: The other day, being afflicted with severe nasal catarrh *quæ causa* in the head, I was tempted to employ a spray of menthol in liquid vaseline. I selected for the purpose a nasal spray apparatus which was at hand ready charged, but to my dismay I discovered when too late that it contained a 1 per cent. of formol. The smarting was severe, but when it had passed off I found that the coryza had subsided, much to my relief. The application of a solution of formol in the treatment of an unquestionably microbial inflammation of the nasal mucosa, if disagreeable, is distinctly reasonable, so I venture to call attention to my accidental experience.

A HALFPENNY IN OESOPHAGUS OF CHILD.

DR. W. I. WATSON (Wellingborough) writes: Three months ago a girl 2½ years old was brought to me who had swallowed a halfpenny, which was supposed to be in the gullet. I put my finger as far down the throat as possible, but could not feel it. The child retched, but the coin was not dislodged. I did not use a horsehair probang, fearing it might push the coin down, and recommended the child to be taken to Northampton Hospital, where the x rays might be used. This was not done. Everything solid has been returned directly, but fluids could be swallowed, and the mother got a baby's bottle for the child. The faeces have been of a very dark colour, and the mother thought the coin was dissolving away, consequently further medical treatment was not sought. When the child was not asleep she was generally crying, and would put her hand to the top of her chest. Yesterday a piece of bloater was given her: she retched twice, got black in the face, and brought up the halfpenny, covered with dark brown matter. It was stained nearly black.

THE PUBLIC ESTIMATE OF THE PARISH DOCTOR.

A CORRESPONDENT sends us a prospectus of Knight's Dictionary of the principal local government officials of England and Wales, and draws attention to the list of prizes offered to local government officials for their experiences in the form of contributions to the *Local Government Chronicle*. He points out that while officials of County, Borough and Town Councils, and even Clerks of Boards of Guardians and Urban and Rural District Councils, are offered prizes amounting to £20, and engineers, surveyors, and the officials in their offices are offered prizes of £15, prizes to the value of £10 are considered sufficient to elicit the experiences of medical officers, who in this respect are classed with the masters, matrons, and steward of workhouses, relieving officers, inspectors of nuisances, sanitary inspectors, nurses, and probationers.

We should certainly expect the experiences of medical officers to be at least as instructive and entertaining as those of the officials to whom higher prizes are offered, and it is pretty certain that medical men are less likely to be able to spare the time for literary work and therefore would require a greater inducement. We do not know the basis upon which the prizes are fixed, but we hesitate to adopt our correspondent's conclusion, and think it probable that the lower sum may be due to the greater number of the medical officers.

LETTERS, COMMUNICATIONS, ETC., have been received from

A. Dr. T. G. Atkins, Cork; Alpin; Anxious; Dr. T. M. Allison, Newcastle-on-Tyne; A. B. C.; Dr. W. B. Bell, Liverpool; Messrs. B. A. and C. Black, London; C. W. Branch, M. SCALE OF CHARGES FOR ADVERTISEMENTS IN THE BRITISH MEDICAL JOURNAL.

Eight lines and under	4 0
Each additional line	0 6
A whole column	2 0
A page	5 5 0

An average line contains six words.

Advertisements should be delivered, addressed to the Manager, at the Office, not later than first post on Wednesday morning preceding publication; and if not paid for at the time, should be accompanied by a reference.

Post-Office Orders should be made payable to the British Medical Association at the General Post-Office, London. Small amounts may be paid in postage-stamps.

N.B.—It is against the rules of the Post Office to receive letters at *Postes Restantes* addressed either in initials or numbers.
