## US doctors are unwilling to pay more to abolish industry funded education

The eighth paragraph of this news article by Bob Roehr stated that "most doctors ( $83 \%$ ) believed that industry support should be eliminated from CME [continuing medical education]" (BMJ 2011;342:d2948, doi:10.1136/bmj.d2948). This is wrong. In
fact, the study from which he was citing found that only $17 \%$ of doctors believed this.
