A 71 year old man with right sided facial droop

The online version of this Endgames picture quiz by Saad Saheecha and colleagues (*BMJ* 2011;343:d5121, doi:10.1136/bmj.d5121) contained a mistake in the labelling of figure 2. The explanations for labels D and E were published the wrong way round. D should have in fact indicated left ventricular aneurysm with thrombus [not the “descending aorta”] and E should have

indicated the descending aorta [not “left ventricular aneurysm with thrombus”].
