## How do we know whether medical apps work?

In this Observations article by Margaret McCartney (*BMJ* 2013;346:f1811, doi:10.1136/bmj.f1811) we should have stated that “an app from Skin Analytics ... offers to track changes in skin moles to ‘raise early warning signs’ by comparison with

previous images of the same mole” [not “by comparison with an online database”].
