Cerebral mass in HIV infection

Due to an editing error, the term “progressive multifocal leucoencephalopathy” was used incorrectly twice in this Endgames quiz (*BMJ* 2013;347:f6314, doi:10.1136/bmj.f6314). In both the fourth paragraph of the long answer to question 3, and the third sentence of the short answer to question 4,

“progressive multifocal leucoencephalopathy” should have read “primary central nervous system lymphoma.”
