CORRECTIONS

Acute altitude illnesses

The authors of this clinical review, Chris Imray and colleagues, have alerted us to an error in their article (*BMJ* 2011;343:d4943 doi:10.1136/bmj.d4943). In figure 3 the dosage for nifedipine should be “30 mg sustained release twice daily” as stated in the

main text (not “6 hourly” as we published, and which the authors had taken from their source for their adapted figure).
