Increased mortality associated with weekend hospital admission: a case for expanded seven day services?

As evident from publications in *The BMJ* and elsewhere,^{1 2} one of the authors of this article (*BMJ* 2015;351:h4596, doi:10.1136/bmj.h4596), Bruce Keogh, who is medical director of NHS England, is a long standing proponent of improving NHS services seven days a week. *The BMJ* should have requested that this be included in the authors' conflict of interest statement.
