Deaths at UK immigration detention centres are the result of avoidable systemic failures, report says

Medical Justice has clarified that 35 deaths in detention were analysed for their report, which is covered in this News story (*BMJ* 2016;354:i4073, doi:10.1136/bmj.i4073), not 38 because

they excluded three deaths from their analysis. The online text of Medical Justice's report has been amended to reflect this.
