Is the United States Preventive Services Task Force still a voice of caution?

In this article (*BMJ* 2017;356:j743, doi:10.1136/bmj.j743) we incorrectly stated that the Kaiser and Duke evidence based practice centers (EPCs) receive funding from industry. In fact, Kaiser Research Affiliates EPC does not receive industry

funding. It is the parent organisation, Kaiser Permanente, which receives 10% of its funding from industry; the Duke EPC is housed within the Duke Clinical Research Institute, which receives 63.3% of its \$331m annual revenue from industry.
