Correction

We regret that a printing error occurred in the paper "Approach to Disability and Breakdown," by Dr. F. Allen Binks (3 February, p. 269). On p. 272, column 2, under the heading **Presuppositions**, line 8 should follow line 5 and form part of the second sentence, which then reads correctly: "There is, moreover, the belief that if only we accumulate enough facts, enough knowledge, the answers will emerge of themselves, that the facts, especially with the help of computers, will provide their own solution."
