Corrections

Deaths from Asthma.—In the letter by Dr. I. W. B. Grant (2 March, p. 575) the second and third lines of the second paragraph should have read "... it would be most unwise for any doctor to permit his patients to use these powerful drugs to excess."

In the epidemiological Table of Infectious Diseases and Vital Statistics for the week ending 10 February (2 March, p. 586) the number of deaths from scarlet fever in England and Wales was erroneously recorded as 382. This referred to the number of cases; no deaths were recorded by the Registrar General.
