Corrections

We regret an error in the report of Dr. Alex C. Forrester's paper on the hazards of anaesthesia at the Clinical Meeting in Londonderry (22 April, p. 235). On page 235, line 11 should have read "This could largely be avoided by using a 2.5% solution and injecting it into a vein on the back of the hand."

The second sentence of Dr. Geoffrey H. Tovey's letter (15 April, p. 174) should have read: "Until, and even when, this material is more generally available, greater use should be made of plasma substitutes, such as Macrodex or dextran 110. . ."

Practical Design for Group Practice: We regret an omission in the bibliographical details of this review (1 April, p. 39). They should have read:

"Design Guide for Medical Group Practice Centres. A study by the National Building Agency, incorporating papers given at a symposium held on 3 June 1966 at the College of General Practitioners, London. (Pp. 64; illustrated, 21s.) London: National Building Agency and College of General Practitioners, 1967."
