

Great news, your institution recently subscribed to **Research to Publication** giving you full access to its online learning

Welcome to Research to Publication

What is it?

Research to Publication is a new e-learning program to help you design, conduct and report on research that journal editors will want to publish.

Developed by BMJ and UCSF for doctors and healthcare researchers, particularly early in their careers, it comprises 8 courses containing over 200 hours of expertise.

Watch Research to Publication video

Benefits

- Build technical research skills
- Improve your research quality
- Advance your career by getting papers published
- Learn at your own pace
- Understand the issues that prevent researchers from getting published
- Help improve patient outcomes with new evidence

Courses

- Developing and reporting good research questions
- Making the best start to your research and publishing
- Picking the best study designs and methods
- Ensuring and reporting research ethics
- How to write research papers that can be trusted and used
- Special considerations for conducting clinical trials
- Submitting research to a journal and achieving publication
- Understanding and avoiding scientific misconduct

Modules

All materials include real examples, including policies and case studies focused on how to present and publish your research.

Work through a variety of multimedia to develop your research and publishing skills; including video lectures, narrated slides, reading materials and online assessments.
