Fast access to clinical decision support anytime, anywhere

Funded by Health Education England, free to all NHS staff in England.

Best Practice supports the multi-disciplinary approach to medicines management

Have confidence in your clinical decisions with the very latest evidence and expert opinion, updated daily, and linked to international guidelines.

Quickly link from treatment options to detailed drug information on dosing, availability, formulations, side effects and contraindications.

Share information and discuss treatment options with patients using our accredited patient leaflets.

Stay current and support your professional development. Record reading with automatic CME/CPD tracking to support revalidation and appraisals.

Available whenever and wherever you need it, with online, mobile and offline access via the Best Practice app.

A 73-year-old woman has osteomyelitis. Staphylococcus aureus is the causative agent. She is receiving intravenous therapy for this infection.

Twenty days into treatment, she develops a generalised maculopapular exanthem with intense pruritus, malaise, and fever. Blood biochemistry shows transaminitis.

What is likely to be going on?

What drug is likely to be causing this problem?

What would you advise?

Log in to BMJ Best Practice to find the answers to these questions.

Access to BMJ Best Practice is provided by Health Education England.

- To access your account, log in with your OpenAthens username and password.
- To register for an OpenAthens account, go to openathens.nice.org.uk, or contact your local NHS library and knowledge service through hlisd.org.

Remember! Download the app for quick access both online and offline.

- Access your App or Google Play store and search for 'BMJ Best Practice'.
- Use your BMJ Best Practice personal account details to sign in and download the content.
