BMJ Case Reports

Give your teams access to the world's largest collection of clinical case reports.

Case reports are an effective way to monitor drug performance. Far exceeding the limited insights of clinical trials, they provide detailed information on symptoms, diagnosis and treatments of patients in real life situations.

**BMJ Case Reports is the largest database of clinical case reports with more than 20,000 cases from over 70 countries.**

Indexed by all the major bibliographic databases, this award-winning resource will give your drug safety, R&D and marketing teams unrivaled access to a wealth of information on adverse reactions, drug effectiveness and novel uses, with clinically important information on common and rare conditions.

**A corporate subscription to BMJ Case Reports provides:**

- Access to the world's largest online collection of case reports
- Dedicated collections focused on pharmacology & therapeutics; contraindications & precautions and drug interactions
- An invaluable resource providing quick information on drug interactions
- 1,000+ cases on novel treatments (new drug/intervention; established drug/procedure in new situation)

To find out how your organization can benefit from a subscription to BMJ Case Reports, please contact **1+ (855) 458-0579**
