

mile for the first 7,000 miles a year and  $\frac{1}{4}$ d. a mile thereafter.

In accepting this interim settlement for hospital medical and dental staff the Staff Side of Committee B has stated:

"(1) The medical and dental professions do not regard these interim increases as reflecting at all adequately the rise in motoring costs since 1952; and (2) having regard to the complete dependence of the hospital service upon the willingness of doctors and dentists to use their private cars upon the business of the hospital authorities, the medical and dental professions greatly regret that their current efforts to negotiate a fair rate of reimbursement for the use of private cars on N.H.S. business (which began with the submission of their first memorandum on 17 March 1966) are not yet within sight of a conclusion."
