Choice of summary statistics: relative and absolute measures

An editorial error was introduced during the preparation of this Letter for publication, which we wish to correct (*BMJ* 2013;346:f1092, doi:10.1136/bmj.f1092). The first sentence of the last paragraph should have read: “The findings in this review do not imply that our methods should be applied to all reviews.”
