## Caution over use of catheter ablation for atrial fibrillation

A tagging error meant that the first subheading of the table in this Analysis article by Van Brabandt and colleagues (*BMJ* 2013;347:f5277, doi:10.1136/bmj.f5277) did not appear. The subheading should have been before the first study (Wazni,

2005) and should have read “Studies recruiting patients with paroxysmal AF†.”
