In this editorial (*BMJ* 2015;350:h2821, doi:10.1136/bmj.h2821) we credited the US National Library of Medicine as solely responsible for digitising the journal's back archive. In fact, the PubMed Central Backissue Scanning Project was very much a

joint venture with the Wellcome Trust and JISC, with the Wellcome Trust paying for most of *The BMJ's* digitisation.
