Richard Lacey: microbiologist who came under fire for claiming a link between mad cow disease and variant CJD in humans

The obituary of Richard Lacey (*BMJ* 2019;365:11078, doi:10.1136/bmj.11078, 12 March 2019) incorrectly stated that his

autobiography was called *Poison on a Plate*. This was the title of an earlier book. The autobiography, *Germ Wars*, was published in February 2019. The online version has been corrected.
