How can we realise the full potential of health systems for nutrition?

In this article by Rebecca Heidkamp and colleagues (*BMJ* 2020;368:l6911, doi:10.1136/bmj.l6911, 27 January 2020) there were some errors in the numbers of countries (n) with available data for figures 3-6. The number of low income countries should be 14 in fig 3, 15 in fig 4, and 14 in fig 6; the

number of lower middle income countries should be 18 in fig 5 and 19 in fig 6; and the number of upper middle income countries should be 7 in fig 6. The online version has been updated.
