A covid-19 laboratory for Jersey—in a shipping container

In this feature (*BMJ* 2020;370:m3336, doi:, published 27 August 2020) we have corrected the definition of RT-PCR (reverse transcription, not real time, polymerase chain reaction). We have also updated some of the numbers: 2000 (not 500) tests a day, with results available within 24 (not 30) hours.
