## Correction

In this article on a lump in the hand by Lydia Robb and colleagues (*BMJ*;2021;373:n1447, doi:) “Epithelial” has been corrected to “Epithelioid” in the penultimate sentence of the first paragraph in the section Patient outcome: High grade epithelioid sarcoma was diagnosed. Also, in the section Learning points, the first sentence “The following soft tissue features require urgent referral to a specialist.” has been replaced with “Consider urgent referral for ultrasonography if the following soft tissue features are present.”
