### CONJOINT BOARD OF THE ROYAL COLLEGE OF PHYSICIANS AND THE ROYAL COLLEGE OF SURGEONS IN IRELAND

L.R.C.P. & S.I.—S. Beejadhur, N. A. Beharry, M. N. Cassimjee, C. Harilall, B. Low-Chew-Tung, D. G. Mather, M. S. Moosa, D. P. O'Connell, B. O. Ojo, M. J. Premjee, M. Ramjoorawon, M. P. Rosen, S. Valli, J. Walsh.

#### Corrections

##### Diabetic Ketoacidosis

In a letter by Dr. A. Glynn (7 November, p. 366) a line of text was inadvertently transposed. The last six lines of the first paragraph should have read "A further five patients had an initial value between 3.6 mEq/l. and 5.0 mEq/l. Three of this group died. In all five of these fatal cases the cause of death could reasonably be attributed to the effect of hypokalaemia on the heart."

##### Emphysema in Coalworkers

In a letter by Dr. W. Raymond Parkes and others (14 November, p. 430) the second line of the second paragraph should read "centrilobular, panlobular, and focal dust . . .". In the sixteenth line of the same paragraph it should read "Is it for this reason that they found panlobular as well as centrilobular emphysema . . .?"

#### Notice to Authors
