Corrections

Next Step in Scotland

The Scottish Council did not agree "that separation would strengthen the profession's political armoury," as stated in the leading article on the reorganization of the Scottish N.H.S. (19 February, p. 462). The sentence should have read: "Indeed, it was argued in the Scottish Council that separation would strengthen the profession's political armoury because the new 'line-management' nature of the reorganized Service would make a combined role difficult to sustain." We apologize for this error.

Christmas Quiz—de Musset's Sign and St. Thomas's Hospital

The answer to question 4(b) in the Christmas Quiz (25 December, p. 806) should have read, "(b) The to-and-fro motion of the entire head due to forcefulness of arterial pulsations in aortic insufficiency." Retinal arteriolar pulsation was a feature added subsequently to the original description of de Musset's sign. Question 5(f) should have read "What hospital moved in 1871?" and the answer should have been "St. Thomas's Hospital to Lambeth."

¹ Friedberg, C. K., in *Diseases of the Heart*, p. 114. Philadelphia and London, Saunders, 1966.

The late Dr. R. E. O'Neal

In the obituary notice (12 February, p. 450) instead of "Royal Eye Hospital" the words "Royal Free Hospital" were inadvertently printed in the second and third paragraphs.
