Corrections

Solids and "Sleeping through"

We regret that an error occurred in the letter from Dr. R. M. Robertson (2 February, p. 200). The first sentence of the second paragraph should have read: "Of the 91 babies in whom the age of dropping the night feed was known, 49 had done so before, 18 during, and 14 shortly after the introduction of cereal."

Persisting Threadworm Infestation

In the answer on threadworm infestation ("Any Question?" 26 January, p. 156) the drug referred to in the second paragraph should have been vipryinium embonate and not viprimin embonate as printed. We apologise for this error.

Universities and Colleges

Dr. J. W. Patterson has had the title of reader in clinical pharmacology conferred on him, and not "reader in ocular pathology", as was inadvertently printed (9 February, p. 254). We regret this error.
