decade, and that though waiting lists have increased from 52,000 in 1963 to 578,000 last year the effect on this of the existence of the pay beds can have been "at the very most" only marginal. (Over 90% of the waiting lists are in surgical specialties and gynaecology.) The Government noted the allegations of abuse made to the Expenditure Committee and the latter's view that it did not believe abuses were widespread. The White Paper states that it is impossible to be "completely certain" that a system of such size and complexity as the N.H.S. will be entirely free of abuse, but "where it occurs it must be firmly checked and it is the Government's intention to ensure that any specific evidence of abuse...is fully investigated and that any necessary action is taken on it." Overall, however, the conclusion is that private practice operates to the benefit of the N.H.S.

R.A.F. Medical Badge

The first new Flight Medical Officers' badges were presented by Air Marshal Sir Ernest Swayne to four officers on 5 April at the Ministry of Defence. Duties of Flight Medical Officers include practice of aviation medicine and advising both of executives and aviators on the medical problems of flight. The officers chosen for the preliminary flying squadron course will not be below the rank of squadron leader and will be serving on permanent commission. They will have completed not less than 30 hours flying in a period of six weeks as part of their training.

Chromically Sick and Disabled Persons

According to a report from the National Fund for Research into Crippling Diseases, who commissioned a survey on the subject, implementation of the requirements of the Chromically Sick and Disabled Persons Act, 1970, varies greatly in different local authority areas, and is not necessarily an index of the financial available or the policy of that area. Their survey showed that less than a quarter of the people estimated by a Government survey in 1971 to be in need of services had been identified by social service departments.

It further showed that provision of home helps, telephones, meals on wheels, and housing adaptions differed markedly from area to area, and the reasons for this were often unclear.

The Implementation of the Chromically Sick and Disabled Act is available from Action Research—for the Crippled Child, Vincent House, 1 Springfield Road, Horsham, Sussex, price £2, post free.

Corrections

We regret that in the list of new Fellows of the Royal College of Surgeons of Edinburgh (31 March, p. 812) the name of Mr. O. Oloae was incorrectly printed as U. Iloae.

Hepes Simplex and Zoster

In the letter from Dr. J. Richardson (31 March, p. 799) the dosage of corticosteroid was given incorrectly as 40 IU daily. This should have read "40 IU daily."
