It is of interest that both she and her husband have also been found to have been infected with brucellosis.

It is now accepted, after the fascinating work of Hutchison et al., that cats (domestic cats in particular) and food contaminated by cat excrement are the major source of infection in man. Pregnant women should therefore avoid contact with young cats. Cases 7, 8, and 9 had almost certainly been infected by their cats. None of the other families had cats as pets. Case 7 was diagnosed only after a process of elimination. The tiredness and prolonged fatigue associated with this disease was only too well demonstrated in all members of this family. The diagnosis was made more quickly in case 10 as he presented shortly after the diagnosis had been established in cases 5 and 7.

Sulphadiazine and pyrimethamine are the drugs usually used in treatment, but only cases 2 and 3 were treated with these drugs.

MEDICAL NEWS

Committee on Alcoholism

Membership of the Department of Health's Advisory Committee on Alcoholism was announced last week in Parliament by Dr. D. J. Hunter. The committee is to advise on services relating to alcoholism and a sub-group will help in the planning and development of services for homeless alcoholics. The chairman is to be Professor W. I. N. Keeler, and other members include Dr. D. I. Acres, Dr. R. Bioglass, Dr. W. H. R. Cook, Dr. D. L. Davies, Dr. J. Griffith Edwards, Dr. H. H. John, Professor W. H. Trethowam, and Dr. J. M. Werner.

Cost of Nuffield Beds

The Nuffield Nursing Homes Trust, which is sponsored by B.U.P.A., now has 24 hospitals in operation in Britain. The average daily cost of a bed at present is £28.13, made up of £15.23 for nursing and domestic salaries, £3.02 for administration, £5.22 for catering and domestic services, £1.92 for rent, rates, heat, light, and power, £1.53 for repairs and renewals, and £1.21 for drugs and dressings.

Free Prescriptions for Low-income Groups

A new leaflet, PC11, has been issued this month by the Health Departments giving details of exemptions from prescription charges available to patients in low-income families. Copies of the leaflet will be available at post offices and social security offices.

B.M.A. Film Awards

On 7 May President of the B.M.A., Sir Ronald Tunbridge, will present the 1974 awards to the following 11 winners chosen from 87 films:

Medical Art

The annual exhibition of the Medical Art Society will be held at Leighton House Arts Gallery on 14-24 April (11 a.m.-6 p.m. Saturday, 11 a.m.-5 p.m.). Membership of the society is open to members of the medical and dental professions, and evening meetings are held from 5.30 p.m. on the second Thursday of the month. This year’s president is Dr. F. J. C. Roe.

Medical Journalism

The annual awards of the Medical Journalists Association are this year being presented by the Reckitt and Colman Pharmaceutical Division. Prizes will be awarded to the “person(s) who, in their view, provided the most valuable service to medical journalism in 1974.” Nominations may be put forward by or on behalf of entrants and must relate to written work published in Great Britain during 1974. Entries should be addressed to Dr. Douglas Robb, 33 Lilian Road, London SW13 9JG.

Thursday, 17 April

ROYAL COLLEGE OF SURGEONS OF ENGLAND.—5 p.m., Hunterian lecture by Professor A. A. Spence: Lung Function Changes in Surgical Patients—Mechanisms and Therapeutic Implications.

Friday, 18 April

ROYAL COLLEGE OF SURGEONS OF ENGLAND.—5 p.m., Hunterian lecture by Professor K. P. Robinson: The Place of LDNS Flap Amputation in Geriatric Patients with Ischaemic Disease.

ROYAL POSTGRADUATE MEDICAL SCHOOL.—11 a.m., Professor A. D. Roy: Geographical Variation in Gastroenterological Disease.

UNIVERSITIES AND COLLEGES

ROYAL COLLEGE OF PHYSICIANS D.C.H.—M. V. Onslow, British Medical Journal, 1976, 2, 1299. Dr. P. J. Lawther, M.O. P. R.C.P., F.R.S., was elected president for the ensuing year.

Correction

Unity and Diversity in Schizophrenia

The letter on page 1234 of the British Medical Journal referred to the lecture 'Diversity and Schizophrenia' by Professor W. J. K. Crockett. The letter from Professor J. K. Crockett should therefore be read as follows:

"We are concerned that the figure of 9/8% which appeared in our paper, 'Diversity and Schizophrenia', might have been misunderstood. We believe that our original intention was to indicate the importance of the interaction between a patient's cultural background and his illness experience."
