Venous thrombosis in users of non-oral hormonal contraception: follow-up study, Denmark 2001-10

There is an error in the results section of this Research paper by Øjvind Lidegaard and colleagues (*BMJ* 2012;344:e2990, doi:10.1136/bmj.e2990). The second sentence should have read: “During this time 5287 diagnoses of first ever venous thrombosis

events were recorded, corresponding to 5.6 per 10 000 woman years [not “8.1 per 10 000 woman years”].”
