### Intravenous fluid therapy for adults in hospital: summary of NICE guidance

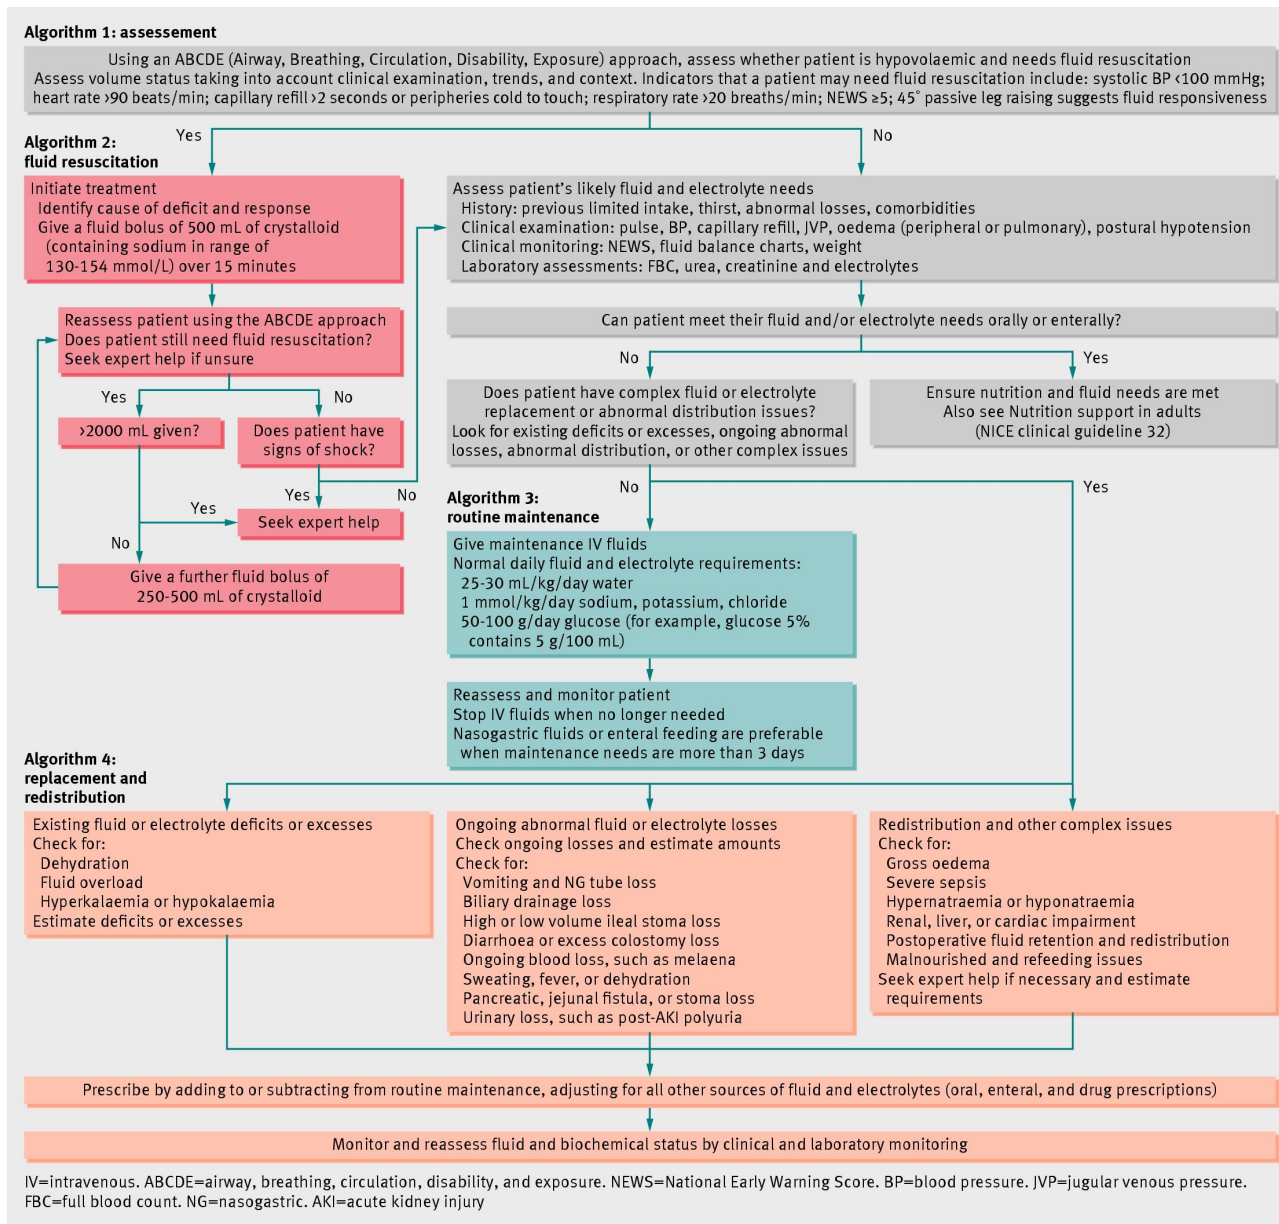

In this Practice article by Smita Padhi and colleagues (*BMJ* 2013;347:f7073, doi:10.1136/bmj.f7073) the figure (algorithms for intravenous fluid therapy) contained an error. In algorithm 3 the normal requirements of sodium, potassium, and chloride

should read 1 mmol/kg/day [not 1 mmol/L/kg/day]. The correct figure is provided here.↓
