## High sensitivity cardiac troponin and the under-diagnosis of myocardial infarction in women: prospective cohort study

Figure 1 in this Research paper contains a typographical error (*BMJ* 2015;350:g7873, doi:10.1136/bmj.g7873). The number of female patients for type 2 myocardial infarction under the reclassification using high sensitivity troponin I assay (sex specific threshold) should have read 28 (6%), not 280 (6%).
