# Incidence of gastric cancer among patients with gastric precancerous lesions: observational cohort study in a low risk Western population

In this Research paper by Huan Song and colleagues (*BMJ* 2015;351:h3867, doi:10.1136/bmj.h3867) the abstract wrongly states the number of participants. The correct number is 405 211 patients (not 405 172).
