Improving immunisation coverage in rural India: clustered randomised controlled evaluation of immunisation campaigns with and without incentives

OPEN ACCESS

In the abstract of this paper (BMJ 2010;340:c2220, doi:10.1136/bmj.c2220), the costs per immunisation for the two intervention

groups are the wrong way around. It should be \$56 for intervention A and \$28 for intervention B.
