Norah Campbell

Angus Campbell

Norah Campbell came from a primary class of 43 on a York council estate, and reached Lady Margaret Hall and the Oxford clinical school. She loved obstetrics, gained her membership of the Royal College of Obstetricians and Gynaecologists in Cardiff, married, and moved to London for research and three children. Later in Manchester she set up an ultrasound service at Trafford General Hospital. When radiology took over ultrasound from obstetrics, she bravely retrained, gained her fellowship of the Royal College of Radiologists at 50, and finished as director of radiology. She also coped with breast cancer and an aortic valve replacement, sustained by her strong Christian faith. In retirement she enjoyed the Anglo French Medical Society and windsurfing in Aquitaine.

After 53 years of marriage, she leaves Angus, her forensic psychiatrist husband; three children (Alison, a GP; Fergus, an NHS administrator; and Andrew, a problem solving electrician); and five grandchildren.

Biography

Consultant radiologist (b 1934; q Oxford 1959; MA, MRCOG, FRCR), died from respiratory failure, fibrotic lung disease, and dementia on 29 June 2019
