Associations of fat and carbohydrate intake with cardiovascular disease and mortality: prospective cohort study of UK Biobank participants

In this article by Ho and colleagues (*BMJ* 2020;368, doi:10.1136/bmj.m688, published 18 March 2020) the data for two of the body mass index categories in table 1 were misaligned. The

data in the rows for underweight and normal weight should be transposed.
