Familial hypercholesterolaemia

In this Practice Pointer by Sarah McErlean and colleagues (*BMJ* 2023;382:e073280; doi:), published on 10 July 2023, we have changed the first image of figure 1 (of tendon xanthoma) to show xanthoma of the Achilles tendons, as these are more representative of familial hypercholesterolaemia than the original image picture (of affected elbows).
