## Prostate cancer incidence and mortality in Europe and implications for screening activities: population based study

In this paper by Vaccarella and colleagues (*BMJ* 2024;386:e077738, doi:, published 4 September 2024), the funding section should have acknowledged the support of the Italian Ministry of Health as well as the independence of the funders. The new statement should read:

**Funding:** DS and LDM were supported by the Italian Association for Cancer Research (grant No 28893) and Italian Ministry of Health (Core Research Budget). The funding sources were not involved in the study design; collection, analysis, and interpretation of data; writing of the report; or decision to submit the article for publication.
