

Figure

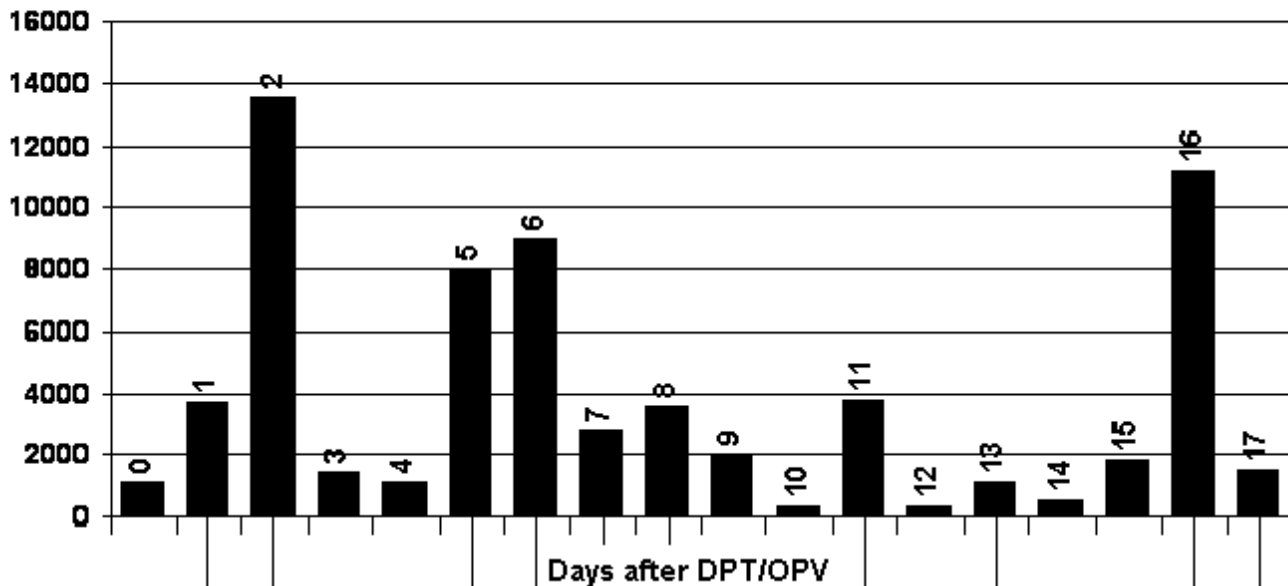

First and second charts: Record of events in breathing in two babies, as monitored by the Cotwatch microprocessor

- Baby 1 had been given the third DPT (diphtheria-pertussis-tetanus) and OPV (oral polio) vaccines and
- Baby 2 had been given the first DPT and OPV vaccines.

Third chart: Actual deaths – 41 randomly listed deaths in relation to when the last DPT vaccine had been administered.

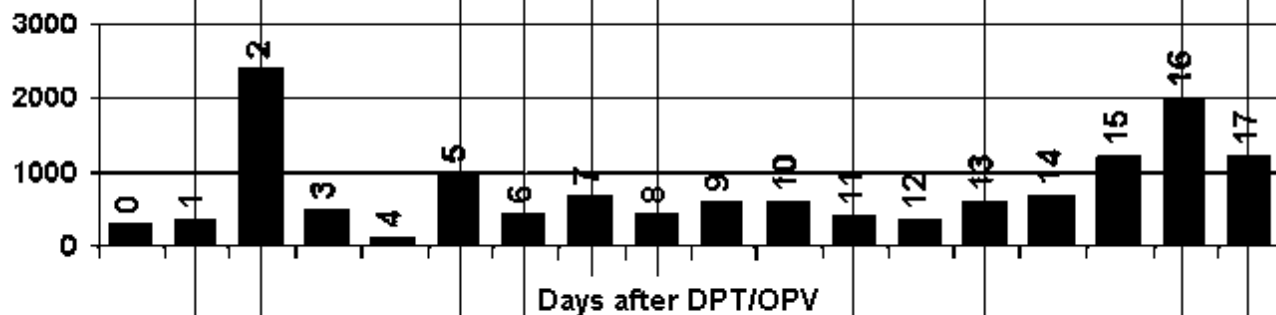

Stress-induced breathing pattern - Baby 1

W.A.H.D.

Stress-induced breathing pattern - Baby 2

W.A.H.D.

Deaths after DPT injection

(from Bernier et al. 1982, Walker et al. 1987, Coulter et Fisher 1991)
